help@beacon-usa.com

IMPORTANT: Return all extra Samplers, tools, wood blocks, and unused pipe to avoid replacement fees.

If sampling through asphalt or concrete:

Do not use pre-mixed patching compounds for the temporary patching of sample holes; these products contain solvents and will bias the results.

You will need:

- DRY CONCRETE MORTAR MIX, SMALL PAIL, WATER AND A SMALL PLASTIC PUTTY KNIFE (for temporary patching of the sample holes).
- HAMMER AND CHISEL (to remove the temporary patch)
- ASPHALT COLD PATCH OR CEMENT (for final repair following retrieval of samplers)
